

Special Issue

Pulmonary and Critical Care Medicine

Message from the Guest Editors

After the COVID-19 pandemic, nothing will be identical in the critical care environment for ARDS patients' management. As COVID-19 has changed our understanding of seeing patients with acute respiratory failure, this experience needs to be described by major experts in the field, and this is the scope of this Special Issue, which invites original research, short reports, and reviews from the real clinical world. In that way, we think a thematic issue in *Healthcare* could capture a "picture" of the most commonly used approaches in critical care for the next generation of our medical students, residents, and physicians during this pandemic.
