

## Special Issue

# Social Media for Health Information Management

### Message from the Guest Editor

This Special Issue is dedicated to exploring the applications of social media analytics for health informatics. It is aimed at scholars and researchers involved in different research areas, from public health to computer and information science, confirming the interdisciplinary character of the journal. We encourage conceptual/theoretical articles, empirical research papers, quantitative and qualitative research articles, and systematic reviews from different countries (low-, middle-, and high-income) as well as different contexts (populations, technologies, or diseases).
