Neuroprotective Strategies for Dry Eye Disease

Message from the Guest Editor

Dry eye is defined as the “multifactorial of the ocular surface characterized by a loss of homeostasis of the tear film instability and hyperosmolarity, ocular surface inflammation and damage, and neurosensory abnormalities play etiological roles”. Much interest has centered around dry eye disease in the past few years, and it is estimated that over 16 million adults in the USA alone suffer from dry eye disease. Neurotrophic factors are secreted by abundant nerve fibers, which are important for the maintenance and repair of cornea. In recent decades, the role of neuropeptides has been elucidated in the pathophysiology of diseases. It is considered that decreased corneal nerve fiber density after corneal injury contributes to the delayed repair effect because of the loss of trophic influences. In this Special Issue of Healthcare, we are seeking articles that provide new insights into the understanding of the neurochemistry, trophic factors and therapeutic potential for treatments including molecular and cellular mechanisms involved in the initiation and perpetuation of inflammation.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with Healthcare and its members receive discounts on article processing charges.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Sue & Bill Gross School of Nursing, University of California, Irvine, CA
92697, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
