Insights into Stroke Care

Message from the Guest Editor

Stroke is a leading contributor to the burden of disease worldwide. Annually, stroke affects approximately 15 million people worldwide and is a major cause of disability. Although acute treatment interventions can reduce the impact of stroke, many are underutilised in practice and this represents an opportunity to intervene and prevent disability or deaths. Prevention interventions are also inconsistently applied and may be enhanced by use of e-health solutions. By making innovative changes to the health system to enable greater access to evidence-based care, the impact of stroke could be moderated. This Special Issue seeks empirical and review papers related to any of these themes, and is not intended to be exclusive of other topics that may be relevant to improving stroke care in hospitals or the community. Developmental (early phase) or pilot projects for innovative programs to support recovery will also be considered.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
