# **Special Issue**

# **Urinary Tract Health and Care**

### Message from the Guest Editors

Lower urinary tract symptoms are common in women of all ages, with different causes and expressions according to patient age and condition. Most of the time the symptoms are transitory and recover with no or simple therapy. Nevertheless, for some women the symptoms are ongoing and interfere with normal routine, impacting quality of life. This Special Issue of Healthcare is dedicated to offering an overview of female urinary tract health and care. Groups from all specialties are encouraged to submit original research articles, project reports, short reports, reviews, and opinion papers.
