Vertebral Related Diseases in Healthcare: The Role of Pain Management and Rehabilitation

Message from the Guest Editors

Vertebral related diseases are considered as a serious medical, social, and economic problems, due to their high prevalence and incidence with rising life expectancy of the general population. They might be represented by several disabling conditions as scoliosis, vertebral fractures, spondyloarthropathy, that could have a negative impact in terms of pain, functioning, and health related quality of life. This special issue aims to evaluate the role of pain management and rehabilitation on reducing clinical manifestations due to vertebral related diseases, currently considered as a main challenge of healthcare.
