Special Issue

Youth Mental Health and Family Support

Message from the Guest Editors

Young people experiencing mental health difficulties often receive treatment and support in their own communities. This Special Issue focuses on innovation in community-based care for young people aged 6-29, and on identifying supportive approaches that foster their success in school, higher education, employment. and social relationships. Of particular interest are services focused on youth aged 14-29 who need support to successfully transition to adulthood. Additionally, papers can examine ways in which families obtain support making it possible for young people to live in their homes or the community while they develop coping skills and successfully integrate into key settings. Particularly welcome are papers focusing on innovative strategies such as peer support for both young people experiencing mental health challenges and their family members. Of considerable interest are ways in which family members manage to care for the young people and engage in employment. We encourage the submission of articles examining social and cultural influences on these processes, and proposing and testing culturally appropriate supports for youth and family.
