Deadline for manuscript submissions:  
**closed (8 April 2024)**

### Message from the Guest Editor

Dear Colleagues,

In recent years, several new drugs have been developed for the treatment of bleeding disorders, particularly in haemophilic patients. These innovative approaches have the advantage of being able to customize therapy based on the patient's hemorrhagic phenotype and pharmacokinetics. Even in patients with deep vein thrombosis and pulmonary embolism, the new oral anticoagulants have changed the management of these patients in both acute and long-term treatment. Advances in pharmacology have significantly influenced thrombotic outcomes, but a detailed assessment of the impact of non-thrombotic diseases on haemostasis and thrombosis is needed to better assess thrombotic risk and establish optimal treatment.

This special issue aims to collect and publish original research articles and reviews demonstrating recent advance in our knowledge on new diagnostic and therapeutic approaches in these clinical conditions with particular regard to the personalization of the patient's treatment on the basis of his clinical characteristics, comorbidities and preference.

Tumori, 47014 Meldola, Italy

## Message from the Editor-in-Chief

*Hematology Reports* (ISSN 2038-8330) is an international open access journal on all aspects of the prevention, diagnosis and management of disorders of the blood, as well as related molecular and cell biology, genetics, pathophysiology, epidemiology and controlled trials. *Hematology Reports* publishes reviews, regular research papers (articles), case reports and communications. Our aim is to collect high-quality articles that are of interest and cutting-edge in hematology, to provide an efficient, reliable and guaranteed platform for scholars and readers, and to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental and/or methodological details must be provided for research articles.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, ESCI (Web of Science), PMC, PubMed, Embase,** and **other databases.**

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 38.9 days after submission; acceptance to publication is undertaken in 6.8 days (median values for papers published in this journal in the second half of 2023).
