Deadline for manuscript  
submissions:

**closed (15 April 2024)**

### Message from the Guest Editors

Dear Colleagues,

The availability of CAR-T therapy is changing the treatment landscape of several haematological malignancies and redefining the role of both allogeneic and autologous stem cell transplantants.

With this Special Issue on haematology, we aim to collect manuscripts from real world experiences regarding the management of patients affected with haematological malignancies and candidates for both transplants or CAR-T strategies.

The ultimate goal of this Special Issue is to capture the modification of the role of transplant strategies as a consequence of the availabilities of advanced immune effector cells therapies and also of a better understanding of the mechanisms of the pathogenesis of each disease.

Dr. Daniele Avenoso

Dr. Maurizio Miglino

## Message from the Editor-in-Chief

*Hematology Reports* (ISSN 2038-8330) is an international open access journal on all aspects of prevention, diagnosis and management of disorders of the blood, as well as related molecular and cell biology, genetics, pathophysiology, epidemiology and controlled trials.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **ESCI (Web of Science)**, **PMC**, **PubMed**, **Embase**, and **other databases**.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.9 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
