

## Special Issue

# State of the Art Papers from the XXXI IACRLD Symposium

### Message from the Guest Editors

The XXXI Symposium of the International Association for Comparative Research on Leukemia and Related Diseases, IACRLD, was held in Bologna, Italy, from August 31 to September 2, 2023, with the participation of many leaders in the field of hematological malignancies. The symposium is always an outstanding event of this association, taking place at various sites worldwide every two years. The recent COVID-19 pandemic highlighted the importance of networking between researchers in all fields of medicine to promote the sharing of knowledge on the virus, inflammation, and hematological malignancies. Furthermore, the availability of genome sequences in humans and animal species opens up new avenues for comparative research and novel therapeutic approaches. In addition to conventional treatment strategies, such as chemotherapeutic drugs and radiotherapy, which have now become completely personalized, immunotherapy has become an efficient strategy for treating cancer. This Special Issue will present research papers, reviews, particularly interesting case reports, and state-of-the-art papers from IACRLD.

### Guest Editors

Prof. Dr. Ali Bazarbachi

Dr. Claudio Cerchione

Dr. Giovanni Martinelli

Prof. Dr. Giuseppe Saglio

### Deadline for manuscript submissions

closed (1 December 2024)
