

Special Issue

Archaeological and Geoarchaeological Heritage and Its Dissemination

Message from the Guest Editors

This volume is focused on research that aims to disseminate information regarding archaeological and geoarchaeological heritage through archaeological and research projects. One of the principal goals of every archaeological excavation is to highlight the importance of the excavated and investigated heritage, not only through preservation studies, but also via the dissemination and integration of the abovementioned heritage in a social context. In general terms, this volume is focused on both dissemination in all knowledge areas as well as on specialised education, mainly at the university level. On the other hand, it is very important to highlight that one of the essential aspects that archaeological and geoarchaeological research should not neglect is the socialization of archaeological heritage, which is dependent on the incorporation of local communities for defense and preservation through various dissemination and cultural promotion tools.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Napoli, Italy

Prof. Dr. Nicola Masini

1. CNR-ISPC (Institute of Heritage Science), 85050 Tito, Italy
2. School of Architecture, University of Basilicata, Potenza, Italy
