Special Issue

Advances in Archaeology and Anthropology of the Ancient World

Message from the Guest Editor

Recent years have witnessed rapid technological advancements in the sensitivity of diagnostic tools, a significant drop in analytical costs, the increased robustness of data processing and the emergence of novel investigative methods which are invaluable in archaeological and anthropological studies. In particular, ancient DNA, proteomics and isotope analyses are ubiquitous and are no longer restricted to specialist publications, becoming instead a part of standardized analytical toolkit which can be applied to specific questions and hypotheses testing. This interdisciplinary alliance results partially form breakthroughs within the respective fields themselves, such as the advances in DNA sequencing, computer modelling or ancient pathogen detection, and partially from moving towards utilisation of novel sources of information, such as, e.g., sediment cores. With the overarching aim of addressing archaeological questions the researchers step beyond conventional investigation of osteological material towards the study of associated contexts applying methodologies transgressing traditional division between fields of anthropology, chemistry, geology, climatology, zoology, etc.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. Heritage has the ambition to become a "cultural forum", where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. Heritage has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend Heritage for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Naples, Italy

Dr. Nicola Masini

CNR-IBAM, 85050 Baragiano Scalo, Italy

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
