

## Special Issue

# Corrosion and Conservation: Protecting Metal Artifacts in Cultural Heritage

### Message from the Guest Editors

This Special Issue aims to bring together leading researchers, conservators, and heritage scientists to address the pressing challenges and innovative solutions in this multidisciplinary field. The issue will explore the science of metal corrosion, the development of diagnostic and monitoring tools, and the implementation of conservation strategies tailored for cultural heritage contexts. It seeks to stimulate scholarly dialogue, share best practices, and highlight advances that bridge the gap between materials science and conservation practice. The Special Issue also seeks to address preventive conservation measures, such as environmental control, packaging, and storage solutions that can mitigate corrosion risk before damage occurs. We invite scholars and professionals from across disciplines to contribute their research and insights to this timely and important collection.

## About the Journal

### Message from the Editorial Board

*Heritage* is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (Archeology (Arts and Humanities))
