Challenges to Heritage Conservation under Climate Change

Message from the Guest Editors

This Special Issue aims to explore sustainable methodologies, tools and strategies for resilience strengthening of cultural heritage at risk under climate change through an interdisciplinary and multi-sectorial approach. Research contributions may include (but are not limited to) the following themes:

- Climate change impacts on cultural and natural heritage;
- Damage evaluation through application of the data from earth observations and climate models;
- Developments and applications of damage functions and modeling;
- Sustainable solutions for protection and conservation under the changing climate;
- Measures and strategies for the prevention and safeguarding of cultural heritage;
- User-driven approaches and tools to support public authorities and private organizations in the decision-making process to safeguard cultural heritage at risk.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.
