

Special Issue

Advanced Analysis of Bioarchaeology, Skeletal Biology and Evolution

Message from the Guest Editor

This Special Issue explores cutting-edge research in bioarchaeology, skeletal biology, and human evolution. Bioarchaeological studies reveal how past societies adapted to their environments and experienced disease and how their biological diversity was shaped.

Developments in skeletal biology, including—but not limited to—histological, isotopic, and biomechanical analyses, refine our understanding of growth, aging, trauma, and pathological conditions, bridging the past and present. Furthermore, evolutionary perspectives allow us to trace long-term changes in human morphology, adaptation, and genetic diversity, shedding light on the forces that have shaped our species over millennia. By integrating these perspectives, this Special Issue welcomes contributions that employ innovative methodologies, interdisciplinary approaches, and new theoretical frameworks to advance our understanding of human biology, diversity, health, and evolution. Topics may include paleopathology, population mobility, diet and health, environmental adaptations, skeletal biology, genetics, forensic case studies, paleoanthropology, and evolutionary patterns in human skeletal variation.

Guest Editor

Dr. Lucie Biehler-Gomez
Department of Biomedical Sciences for Health, University of Milan,
Milan, Italy

Deadline for manuscript submissions

30 November 2026

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Napoli, Italy

Prof. Dr. Nicola Masini

1. CNR-ISPC (Institute of Heritage Science), 85050 Tito, Italy
2. School of Architecture, University of Basilicata, Potenza, Italy

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (Archeology (Arts and Humanities))
