

Special Issue

Colour Photography and Film: Analysis, Preservation, and Conservation of Analogue and Digital Materials

Message from the Guest Editors

Colour photography and film materials fully became part of cultural heritage just a few decades ago. When considered not only as a tool capable of visually documenting movable and immovable assets, photography and film also become works of art. Thus, historical and artistic values yield to provisions for protection, conservation and enhancement. This Special Issue will focus on the growing international interest in visual memory, its results and issues related to photo and film material preservation, conservation, investigation, transmission, and use. This Special Issue discusses and covers the history of photographic processes, their technicality and practice, today nearly lost. Furthermore, the history and conservation issues of motion film processes, either designed for professionals or amateurs, are also investigated. Finally, papers dedicated to the necessity of a wider view on film and non-film material are also welcomed. A further discussion on traditional restoration and digital methods involved in the reconstruction of films is highly encouraged.

All papers submitted by 31st December 2022 will be free of charge.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Napoli, Italy

Prof. Dr. Nicola Masini

1. CNR-ISPC (Institute of Heritage Science), 85050 Tito, Italy
2. School of Architecture, University of Basilicata, Potenza, Italy
