

Special Issue

Sustainability for Heritage

Message from the Guest Editor

Over the past 50 years, many achievements have been celebrated within the heritage sector. One of those achievements is the sector's collective progress and commitment to sustainability and the sustainable conservation of cultural heritage. This is particularly significant as such an approach to heritage conservation is also very important in addressing the irrefutable risks to heritage due to climate change and environmental degradation, among our biggest challenges. This Special Issue aims to attract high-quality manuscripts with a research focus on climate change, environmental degradation, and the sustainable conservation and resilience of heritage; in doing so, it encourages the submission of any contributions related to this important topic by researchers, asset managers, and practitioners whose interests are focussed on cultural heritage and the exploration and delivery of sustainable solutions.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Napoli, Italy

Prof. Dr. Nicola Masini

1. CNR-IBAM, 85050 Baragiano Scalo, Italy

2. School of Architecture, University of Basilicata, Potenza, Italy
