Special Issue

Preservation of Cultural Heritage: The Nexus of Diagnosis-Prevention-Sustainability

Message from the Guest Editors

Cultural heritage is threatened by climate change, natural disasters, urbanization, neglect, vandalism, and armed conflicts. A structured framework of diagnosis. prevention, and sustainability is vital to address these challenges. Diagnosis involves assessing heritage assets, identifying decay patterns, and understanding deterioration factors using advanced technologies like non-destructive and remote sensing techniques. Prevention focuses on proactive measures such as monitoring, risk management, and protective buffers to minimize degradation. Sustainability ensures long-term preservation by integrating eco-friendly materials, energy-efficient systems, and aligning conservation with socio-economic development, including land planning and tourism management. This Special Issue explores a multidisciplinary approach to heritage preservation, examining the interconnections between diagnosis, prevention, and sustainability, while proposing innovative strategies to safeguard cultural heritage for future generations.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. Heritage has the ambition to become a "cultural forum", where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. Heritage has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend Heritage for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Naples, Italy

Dr. Nicola Masini

CNR-IBAM, 85050 Baragiano Scalo, Italy
