

Special Issue

Built Heritage Conservation and Climate Change

Message from the Guest Editors

Climate change promises to have significant a impact on cultural heritage, while there are pressures to reduce the carbon footprint of historical buildings to meet climate change mitigation targets. However, cultural heritage arguably represents a special case in terms of limits of acceptable change for both mitigation and adaptation. This Special Issue calls for papers in the area of methodological approaches in assessing vulnerability to climate change in the built heritage sector, and on management options addressing both mitigation and adaptation in an era of reducing energy use and increasing concerns regarding climate change risks and sustainability.

About the Journal

Message from the Editorial Board

Heritage is an international, peer-reviewed, open access journal that focuses on knowledge, conservation, interpretation and management of cultural and natural heritage, by presenting and enabling novelty and advances in sensing technologies, novel methods, best practices and policies. *Heritage* has the ambition to become a “cultural forum”, where scientists and experts offer answers to significant issues affecting cultural and natural heritage, by creating a knowledge bridge between different technological and social disciplines. *Heritage* has an Editorial Board of eminent international leaders and this ensures rigorous peer-review processing for high quality and novel papers. We strongly recommend *Heritage* for the rapid and professional publication of your innovative research and case studies.

Editors-in-Chief

Dr. Francesco Soldovieri

National Research Council of Italy (CNR), Institute for Electromagnetic Sensing of the Environment (IREA), Via Diocleziano 328, 80124 Naples, Italy

Dr. Nicola Masini

CNR-IBAM, 85050 Baragiano Scalo, Italy
