

Special Issue

Biochips

Message from the Guest Editor

This Special Issue of *Microarrays* will be focusing on Biochip. The understanding of the term “Biochip” shall be an analytical or a diagnostic system using biological or biochemical components, living or not. The system shall also exhibit active functions, such as microfluidic and/or signal transduction. Thus, manuscripts describing cell-on-chip, organ-on-chip, and integrated microarray devices are welcome. Interesting approaches using 3D printing of biochips are also warmly welcome since this is a very hot topic in the field of functional devices prototyping and production.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Massimo Negrini
Department of Morphology, Surgery and Experimental Medicine,
University of Ferrara, Ferrara, Italy

Author Benefits

Rapid Publication:

first decisions in 19 days; acceptance to publication in 4 days (median values for MDPI journals in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
