

Special Issue

Human Microbiome and Diseases: Implications for Novel Therapies

Message from the Guest Editor

The human microbiome has emerged as a new important player for human health status acquisition and maintenance. Recent advances in next generation sequencing technologies have increased our ability to study the complexity of microbial communities at deeper resolution. As a consequence, several studies have highlighted the presence of a microbial dysbiosis in an increasing number of diseases. Shedding light on the complex interactions between the human host and its microbial communities may provide novel insights into disease pathogenesis and their treatment. Indeed, this evidence is prompting metagenomic studies in the attempt to identify novel disease biomarkers for diagnosis and monitoring, and also novel actionable targets for the development of novel therapies based on microbiome manipulation. This Special Issue on the “Human microbiome and diseases” will focus on the state-of-the-art of this emerging field that highlights the important interplays between humans and microbes. The powerful understanding of these relationships still needs to overcome technological challenges specially to test the efficacy and safety of possible therapeutic approaches.

Guest Editor

Prof. Dr. Valeria D’Argenio

1. Department of Human Sciences and Quality of Life Promotion, San Raffaele Open University, Rome, Italy
2. CEINGE-Biotecnologie Avanzate Franco Salvatore, Napoli, Italy

Deadline for manuscript submissions

closed (15 March 2020)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Massimo Negrini
Department of Morphology, Surgery and Experimental Medicine,
University of Ferrara, Ferrara, Italy

Author Benefits

Rapid Publication:

first decisions in 19 days; acceptance to publication in 4 days (median values for MDPI journals in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
