Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue of *Horticulturae* is to present current original research articles and review articles focused on “Sustainable Horticulture in Marginal Environments”. Achieving food security sustainably is facing a number of environmental challenges, which are particularly pronounced in countries and regions dominated by an arid climate. Being aware of the efforts and initiatives taken in recent years by a number of stakeholders, we wish to invite submissions of relevant research works and state-of-the-art review articles in order to highlight the most recent and impactful developments. Sustainable solutions to increase crop production and alleviate the predicted negative impact of global climate changes to improve food security, reduce vulnerability, and increase resilience, constitute the major focus of this Special Issue. Novel and modern agricultural technologies, controlled environment horticulture, developments in postharvest techniques and methods, and efforts to improve supply chains are all within the scope of this Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank: JCR - Q1 (*Horticulture*) / CiteScore - Q2 (*Horticulture*)
