submissions:

**closed (16 February 2024)**

### Message from the Guest Editors

The open-access journal *Horticulturae* (IF: 2.331; Q1 in Horticulture) is pleased to announce that we have launched a new Special Issue titled “Genetic Resources and Breeding Trends of Berry Crops”. Given your expertise in this field, we would like to invite you to contribute an article to the present Special Issue.

The proposed aims of this Special Issue are to present advanced studies, methods, tools, and innovations in the field of small fruit breeding and study and involve genetic resources for the development of new cultivars. We hope to receive your contributions so as to share them with the community of researchers, students, and technicians community, new knowledge of progress in the breeding of new cultivars in the light of ongoing climate change. In the hope that this invitation receives your favorable consideration, we look forward to our future collaboration.

Breeding programs are taking advantage of modern technologies, underpinning the development of more resilient and high-quality cultivars. Integration of new tools of smart phenotyping and marker-assisted breeding offers new possibilities for a more efficient breeding process.

an Open Access Journal by MDPI

Environmental Sciences and  
Technologies (DiSTeBA), Salento  
University, 73100 Lecce, Italy

## Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

**Journal Rank:** JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
