

# Special Issue

## Novel Insights into Sustainable Viticulture

### Message from the Guest Editors

This Special Issue aims to highlight advancements in grapevine propagation that enhance sustainability, focusing on both traditional and cutting-edge techniques that ensure genetic integrity, disease resistance, and environmental adaptability. We encourage submissions that explore a range of topics, including but not limited to clonal selection, hybridization, the use of rootstocks, biotechnological innovations, and organic practices. Furthermore, we are interested in research that applies precision agriculture technologies to optimize vineyard management and ensure the sustainability of viticulture practices.

This Special Issue will serve as a comprehensive resource for horticulturists, agronomists, researchers, and industry stakeholders who are at the forefront of transforming grape cultivation to meet modern challenges while maintaining the highest quality of grape production. Through collaborative research, we aim to foster viticultural practices that are productive, sustainable, and adaptable to changing climatic conditions.

Submissions of original research articles, review papers, and case studies are welcome. We look forward to your contributions.

## About the Journal

### Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
