

Special Issue

Sustainable Cultivation and Performance of Ornamental Plants

Message from the Guest Editors

This Special Issue aims to explore recent findings on adaptation strategies and sustainable cultivation practices in ornamental plants, with a focus on scientifically robust, mechanism-oriented studies that span topics from individual plant performance to ecosystem-level outcomes. Topics of interest include, among others, the following:

- Plant morphology, anatomy, and physiology;
- Plant responses to stress;
- Selection of adaptable and dwarf genotypes;
- Edible plants in landscaping;
- Plant growth regulation;
- Biological plant protection;
- Propagation techniques;
- Biodiversity conservation.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and
Technologies (DiSTeBA), Salento University, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
