

Special Issue

Vine Cultivation in an Increasingly Warming World

Message from the Guest Editors

This Special Issue is focused on vine cultivation, both table and wine grapes, in relation to climate change and the need to introduce water- and energy-saving techniques and technologies to safeguard productivity, sustainability, and biodiversity in the vineyards. The Special Issue is intended to include articles related to the adaptation of viticulture to climate change in order to maintain yield and quality, improving vine resistance to biotic and abiotic stresses and developing new varieties.

Guest Editors

Dr. Antonio Coletta
Prof. Dr. Luigi De Bellis
Dr. Riccardo Velasco

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and
Technologies (DiSTeBA), Salento University, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
