Special Issue

Tea Tree: Cultivation, Breeding and Their Processing Innovation

Message from the Guest Editors

The purpose of this Special Issue, "Tea Tree: Cultivation, Breeding and Their Processing Innovation", is to present innovative studies, approaches, and techniques that have been successful in cultivation and breeding as well as their processing. Tea chemistry relating to major and minor components, as well as their sensory and flavor aspects, will also be considered. Tea physiology (biochemistry, physiology, genetics, etc.) at diverse levels of integration (molecular, subcellular, cellular, organ, etc.) will also be considered.

Guest Editors

Prof. Dr. Kunbo Wang

Prof. Dr. Jian Zhao

Prof. Dr. Liang Zhang

Dr. Ligui Xiong

Dr. Qin Li

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis

Department of Biological and Environmental Sciences and Technologies (DiSTeBA), Salento University, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
