

Special Issue

Strategies of Producing Horticultural Crops Under Climate Change—Second Edition

Message from the Guest Editors

Following the success of the first edition of the Special Issue “Strategies of Producing Horticultural Crops Under Climate Change” (https://www.mdpi.com/journal/horticulturae/special_issues/NL5G9Q8603), a second edition is being launched.

Climate change is among the most challenging risks that the planet is facing. In this regard, horticulture is affected by water scarcity for irrigation, a decrease in the quality of water and/or agricultural soils, crop development and growth, fruit setting and yield, fruit quality and physiopathies, and even the quality of processed foods as a consequence.

Thus, this Special Issue is aimed at innovative studies working with a range of alternatives to fight against climate change and its effects on horticultural production. Works on soil and environmental solutions, for example biofertilizers or mycorrhization, seed management and solutions, irrigation techniques, crop rotation, mulching, plant-and-soil interactions, plant breeding, valorization of new crops, plant protection, recovery, and application of useful ancestral techniques, aimed at improving the growth, yield, and/or quality of horticultural crops, will be welcomed in this SI.

Guest Editors

Prof. Dr. Adrián Rodríguez-Burruezo

Instituto de Conservación y Mejora de la Agrodiversidad Valenciana (COMAV), University Polit cnica de Valencia, Camino de Vera s/n, CP 46022 Valencia, Spain

Dr. Carla Guijarro-Real

ETSIAAB, Department Biotechnology and Plant Biology, Universidad Polit cnica de Madrid, Av. Puerta de Hierro, 2, Moncloa-Aravaca, 28040 Madrid, Spain

Deadline for manuscript submissions

5 April 2027

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and
Technologies (DiSTeBA), Salento University, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
