New Insights into Developmental Biology of Fruit Trees

Message from the Collection Editors

With the rapid development of science and technology and the rapid changes in biological disciplines such as molecular biology, biochemistry, cell biology, and plant physiology, the era of scientific research on fruit tree life phenomena through interdisciplinary and multi-methods has arrived. Especially in recent years, researchers from different levels of molecular biology, biochemistry, cell biology, anatomy and morphology have used a variety of experimental methods to study the cytology of the external development and internal structure of fruit trees, as well as morphological processes and their cellular and molecular biological mechanisms, achieving very impressive research results. Therefore, we plan to publish a Special Issue focusing on fruit tree developmental biology, and introducing the latest research results of model plants and bioinformatics technology in this field. Through this Special Issue, researchers can keep track of the latest research results and developments.

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and
Technologies (DiSTeBA), Salento University, Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
