

Special Issue

From Farm to Table in the Era of a New Horticulture in Spain

Message from the Guest Editors

Concepts of horticultural science are utilized for the production, enhancement and marketing as well as the improvement of human and animal life on Earth. With an arable land of 16.9 million hectares, and a world population that will increase from the current 7 billion to 9.5 billion by the year 2050, new technological advancements in horticulture have emerged as a major focus in crop production. The field of horticulture has grown exponentially in recent years. The future of horticulture holds different possibilities for progress in terms of new technologies and precision agriculture, sustainable practices, urban agriculture, climate resilience, consumer preferences, health and wellness and biodiversity conservation. In the context of promoting efficient and sustainable crop production systems, that require less inputs and biodegradable wastes as well as do not compromise productivity and quality, we present this Special Issue with the aim to provide insights.

Guest Editors

Prof. Dr. María del Carmen Martínez Ballesta
Dr. Victor M. Gallegos-Cedillo
Dr. Almudena Giménez

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and
Technologies (DiSTeBA), Salento University, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
