

Special Issue

Germplasm Resource Identification and Genetic Improvement of Horticultural Crops—2nd Edition

Message from the Guest Editors

Germplasm resources are the basis of genetic material for plant breeding and crop improvement. In order to make better use of the germplasms of horticultural crops and promote the development and innovation of breeding technology, *Horticulturae* is launching a Special Issue on the topic of germplasm identification and genetic improvements of horticultural crops and is beginning to collect necessary high-quality articles. The topics of submissions to this Special Issue include, but are not limited to:

- Accurate identification of the germplasm resources of relevant horticultural crops, deeply understanding the characteristics of different varieties of the same species, and making better use of germplasm resources;
- Utilization of heterosis methods (utilization of self-incompatibility, utilization of male sterile lines, etc.) to generate new excellent cultivars;
- Applications of molecular breeding technology, including gene editing, which can improve horticultural crops and improve adaptability;
- Development of speed breeding and other new technologies for improving germplasms which provide faster and more precise strategies for the breeder.

Guest Editors

Prof. Dr. Liwang Liu

College of Horticulture, Nanjing Agricultural University, Nanjing 210095, China

Prof. Dr. Yangyong Zhang

Key Laboratory of Biology and Genetic Improvement of Horticultural Crops, Institute of Vegetables and Flowers, Chinese Academy of Agricultural Sciences, Ministry of Agriculture, Beijing 100081, China

Deadline for manuscript submissions

15 September 2025

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and
Technologies (DiSTeBA), Salento University, Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
