## Mineral Nutrition of Plants

### Message from the Guest Editors

Plants uptake nutrients. These nutrients can be transported, accumulated and redistributed. Leaves, flowers or other parts of plants can be collected, prepared and subjected to analysis in a laboratory. Also, non-destructive methodologies can be used to estimate nutrient levels in plants helping us to define the need for fertilization in crops. Nutrients can positively impact the growth, productivity and quality of the food produced by a plant, with a deficiency or excess of nutrients having the ability to harm plants. This SI welcomes manuscripts on topics related to plant strategies for increasing nutrient availability; chemical species of nutrients in soil and solution and their relationship with mineral nutrition; morphology and anatomy of the root system and the relationship with nutrition in plants; absorption, transport and redistribution of nutrients in plants; impact of fertilization on growth, productivity and food quality; methods/methodologies for estimating nutrients in plants; use of non-destructive methods/methodologies for estimating nutrients in plants; relationship of nutrients with the incidence of diseases in plants; mineral nutrition; and food quality.

### Guest Editors

Dr. Gustavo Brunetto

Department of Soil Science, Federal University of Santa Maria, Prédio 42, Office 3309, Avenida Roraima 1000, Santa Maria 95105-900, Brazil

Dr. Danilo Eduardo Rozane

Department Agronomy and Natural Resources, São Paulo State University (UNESP), Av. Nelson Brihi Badur, 430, Vila Tupi, Registro 119000-000, SP, Brazil

### Deadline for manuscript submissions

30 October 2025

## About the Journal

### Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

### Editor-in-Chief

Prof. Dr. Luigi De Bellis  
Department of Biological and Environmental Sciences and  
Technologies (DiSTeBA), Salento University, Lecce, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

#### Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
