Special Issue

Integrated Control of Horticultural Crop Diseases: Current Status and Perspectives

Message from the Guest Editors

The control of plant diseases constitutes one of the main concerns in agriculture. This Special Issue of Horticulturae is dedicated to gathering interesting, innovative and creative technologies developed in the area of the Integrated Control of Horticultural Crop Diseases to provide potential interested readers and farmers with new tools and strategies, alternative to the traditional forms of crop management requiring large amounts of agrochemicals. We are persuaded that an integrated control of horticultural crop diseases is unquestionably essential for the agriculture of the future. Hence, we invite you to submit a contribution to this interesting issue to support sustainable agriculture. Original papers, reviews and comments are welcome.

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief
