

Special Issue

Functional Characterization of Mediterranean Berries

Message from the Guest Editors

The goal of this Special Issue is to collect recent research studies dealing with the characterization of fruit berries typical of the Mediterranean basin. This Special Issue will cover any aspects dealing with Mediterranean berries, such as the presence of natural important compounds at pharmaceutical, antioxidant, and phytochemical levels. Any studies dealing with the agronomic, chemical, and functional genomic characterization of berries of plant species cultivated in the Mediterranean basin are interest for this Special Issue.

About the Journal

Message from the Editor-in-Chief

Horticultural plants and their products provide sustenance, health, and beauty. A confluence of factors is putting increasing pressure on horticultural production to evolve, and innovative research is addressing these challenges. *Horticulturae* provides a venue to communicate research results in a rapid manner with open access, allowing everyone the opportunity to stay abreast of leading research addressing horticulture. I invite you to consider publishing the results of your research in this high quality, peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Luigi De Bellis
Department of Biological and Environmental Sciences and
Technologies (DiSTeBA), Salento University, 73100 Lecce, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Horticulture) / CiteScore - Q1 (Horticulture)
