The Anatomy of Inscription

Guest Editor:

Dr. Hunter Dukes

Faculty of English, University of Cambridge, 9 West Rd, Cambridge CB3 9DP, UK

Deadline for manuscript submissions:

closed (1 September 2018)

Message from the Guest Editor

How do the material properties of writing feed back into its semantic sense, differing when engraved in stone or tattooed on skin? Are inscriptions in paintings — which are sometimes indecipherable — fundamentally different from text in film? The recent material, object-oriented, and affective approaches to criticism have all sounded the death knell for the linguistic turn's methodological dominance. While theorists have analysed how bodies are inscribed and encoded, less attention has been devoted to the agential potential of inscription itself. Beyond bibliographic considerations of material culture, how does a body of text impact biological bodies? And how do literature, film, and the visual arts reimagine the boundaries between these two kinds of corpora?

This special issue of Humanities takes an expanded sense of inscription as its starting point, inviting a variety of approaches. I particularly welcome articles that consider: nonhuman writing, filmic and painterly text, new accounts of gesture and ornament, the history of the alphabet, and how metaphors of information storage play out on different scales (genetic, geological, historical).

Message from the Editor-in-Chief

We welcome contributions that address fundamental issues in the Humanities from any meaningful perspective, combining past and present concerns in order to blaze a path toward the future. Interdisciplinary approaches are particularly welcome. All submissions will be critically reviewed by peers, aiming for the highest possible scholarly level. Being an online journal, the published papers will reach their desired audiences faster, more reliably, and much more easily than traditional print versions, while upholding the same, if not even higher, scholarly standards.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), ERIH Plus, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.7 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2025).
