Message from the Guest Editors

This Special Issue aims to collect the latest methodological developments and applications in the field of flood early warning. Potential topics include, but are not limited to, the following:

- Flood dynamics, mechanisms and processes
- Development of methods for flood early warning, especially in ungauged basins
- Improvement of flood forecasting and information dissemination using various information sources
- New methods/techniques for flood risk analysis, vulnerability analysis and evacuation behavior
- Empirical analysis of flood warnings and flood-mitigation practices during real-world flood events
