Deadline for manuscript  
submissions:

**31 August 2024**

### Message from the Guest Editors

Dear Colleagues,

We invite scholars to address the following questions:

- How and why is stigma weaponised against people who use drugs?
- What social and health harms arise from stigma connected to drug use? We are particularly interested in a focus on mental health.
- How is stigma variously experienced by PWUD from within and across different stages of the criminal justice system, social care, and public health services?
- How is stigma identified, negotiated, resisted, or refused by people who use drugs at different stages of the life course and across different intersections of identity?
- How does the stigmatisation of people who use drugs impact on a person's sense of inclusion in society?
- Does stigma harm people who use drugs equally, or is this unevenly experienced?
- How can we imagine criminal justice systems and public health differently so that they operate to reduce social harm experienced by PWUD?

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
