

## Second Edition: Cancer Health Disparities and Public Health

Guest Editors:

**Dr. Ken Batai**

Department of Cancer  
Prevention & Control, Roswell  
Park Comprehensive Cancer  
Center, Buffalo, NY 14203, USA

**Dr. Francine C. Gachupin**

Department of Family and  
Community Medicine, College of  
Medicine, University of Arizona,  
Tucson, AZ 85721, USA

**Dr. Shaila Strayhorn**

Department of Public Health,  
School of Health & Applied  
Human Sciences, University of  
North Carolina Wilmington,  
Wilmington, NC 28403, USA

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

Cancer burden varies across populations, with higher incidence and mortality of specific cancer types in medically underserved populations compared to others, resulting from varying degrees of interactions between genetic/biologic, behavioral, societal, and environmental risk factors. Patients from underserved populations often experience prejudice and/or discrimination in healthcare, or clinicians' bias may negatively affect patient care. Cultural values or personal beliefs may also affect choice of care and treatment. During and after the COVID-19 pandemic crisis, these underlying factors were exacerbated, and racial/ethnic minority and other underserved populations experienced marked challenges undergoing cancer screening, treatment, and care. Research is necessary to further understand the underlying causes, contributing and underlying factors, intersectionality of these, and impacts on cancer screening, treatment, and care in order to develop education, outreach, policies, recommendations, and clinical practices to reduce cancer disparities and build equity in cancer prevention, treatment, and care.

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

RCMI Center for Urban Health  
Disparities Research and  
Innovation, Richard Dixon  
Research Center, Morgan State  
University, 1700 E. Cold Spring  
Lane, Baltimore, MD 21251, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
