Deadline for manuscript  
submissions:

**closed (31 July 2023)**

### Message from the Guest Editors

Adolescence represents a good opportunity to promote a healthy lifestyle, but also to improve poor health.

The most important public health interventions are informing or educating the target population about risks, persuading them to reduce those risks, encouraging them to adopt healthy or safe behaviors, and modifying the environment to reduce exposure to risks or to promote or facilitate safe or healthy behaviors.

The aim of this Special Issue, which is the 2nd Edition of the previously successful Special Issue *Adolescent and Young People's Health Issues and Challenges*, is to amplify the link of the previous Special Issue and to put more emphasis on prevention and intervention.

We welcome papers that address adolescent and young people's health from different perspectives and research fields, such as Public Health, Clinical and Preventive Medicine, Psychology, Sociology, etc. Multidisciplinary papers are also welcome, as are papers which bring novel approaches to public health interventions. We look forward to receiving your contribution and creating a Special Issue that will provide readers with new information on adolescent and young people's health.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

RCMI Center for Urban Health  
Disparities Research and  
Innovation, Richard Dixon

University, 1700 E. Cold Spring  
Lane, Baltimore, MD 21251, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
