submissions:
closed (30 September 2023)

Message from the Guest Editors

Nowadays, there are over 3.9 billion people living in the urban areas. Therefore, to identify the relationship between the urban environment and civil well-being becomes a central issue in sustainable science. This special issue focuses on the dynamics of urban environment and civil well-being.

We welcome both empirical and conceptual papers investigating how urban environments influence civil well-being in city scale. For this Special Issue, papers will need to contribute to new theories, new methods, new data and new situations of urban environment and civil well-being. What meaningful implications can be proposed for mental condition management? The guest editors look forward for your valuable contributions!

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
