Deadline for manuscript  
submissions:

**closed (23 March 2023)**

### Message from the Guest Editors

This Special Issue focuses on the new advances in the physiotherapy discipline and their role and relevance in healthcare and education. Physiotherapy is one of the disciplines aiming at improving and maintaining physical function, amongst others, of patients in order to achieve an optimal level of health. Advances in scientific research in terms of physiotherapy, rehabilitation, therapeutic exercise and other techniques related to the discipline, as well as the assessment of outcomes related to the profession, are important for daily life practice. It is necessary to continue increasing and developing knowledge with studies that show the latest advances in physiotherapy, for in-hospital care, primary, secondary or tertiary care, and also in education and innovation among students and future physiotherapy professionals, in order to share and disseminate studies of high interest to improve physiotherapy practice, as well as the academic sphere in physiotherapy. We strongly believe this Special Issue will offer a good platform for sharing professional and academic experience gained in different domains of physiotherapy.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
