Policies and practices that promote healthy work are a benefit to everyone. It is, however, now more than 20 years since Levy et al. published “Work-related stress—it’s time to act”. Various theories that sought to explain work-related stress and its causes had already been proposed, there was evidence that exposure to workplace stressors threatened individual psychological and physical health, and a business case for action through the accumulating evidence of the substantial economic cost to organizations and society of occupational stress existed. After 20 years, psychosocial hazards at work remain a significant problem and a global concern. There is international agreement that occupational stressors must be better managed. Whilst there is consensus that a proactive population approach is required to prevent or at least ameliorate the effects of stressors and that reactive approaches do not meet normal duty-of-care expectations on employers, successful intervention is difficult. There have been various initiatives to help employers tackle work-related stress (Management Standards Cousins et al 2004). What else is being done to tackle work-related stress?

USA

This research has played a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Public, Environmental & Occupational Health) / [CiteScore](#) - Q1 (Public Health, Environmental and Occupational Health)
