

## **Toward Healthy Aging and Age-Friendly Communities: Advances in Methods, and Challenge for Implementation Research**

Guest Editors:

**Dr. Seungwon Jeong**

**Prof. Dr. Katsunori Kondo**

**Prof. Dr. Toshiyuki Ojima**

Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### **Message from the Guest Editors**

The world's population is aging faster, which will undoubtedly impact all aspects of society. At present, the world is trying to improve the social environment to reduce health disparities, a risk factor of healthy aging. The WHO advocates for "Age-Friendly Cities" as a tool for the diagnosis and evaluation of the social environment and, in the last decade, has proposed eight interconnected domains of life (Community and Health Care, Transportation, Housing, Social Participation, Outdoor Spaces and Buildings, Respect and Social Inclusion, Civic Participation and Employment, Communication, and Information). In 2020, it proposed the "Decade of Healthy Aging", which requires collaborative action among governments, civil society, international interventions, professionals, academia, the media, and the private sector. We invite you to submit to this Special Issue an original research paper or review article that addresses one or more of the abovementioned topics and can help to improve the lives of older people, their families, their communities, and, hence, the world.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
