Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editors

We are organizing a Special Issue on new frontiers in developmental psychopathology. We strongly believe in the importance of developing assessment and diagnostic tools capable of grasping the many specificities of developmental age. The psychological assessment of children and adolescents is a complex process, as well as more specific diagnostic criteria and intervention techniques. We firmly believe that such tools, diagnostic criteria and techniques should be specifically aimed at grasping the complexity of developmental age, rather than being simplifications of methods used for assessing adult individuals and working with them. A good assessment is an assessment that can effectively inform clinical intervention, enhancing the rich clinical literature already existing with empirical research aimed at further understanding children's and adolescents' psychological functions and characteristics.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
