Message from the Guest Editors

Dear Colleagues,

This Special Issue will examine cutting-edge ideas for future research on methods of prevention of breast cancer through social and environmental interventions. Each manuscript in this Special Issue will examine an innovative method by which we could alter the trajectory of social and environmental exposures that impact the population incidence of breast cancer.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
