2. Family Health Unit Beira Ria, 3830-596 Gafanha da Nazaré, Portugal

Deadline for manuscript submissions:

31 December 2024

Message from the Guest Editor

Primary care services play an important role in preventing ill health, both physically and mentally, not only of our patients and their families but also of migrants and refugees. The purpose of this Special Issue is to gather recent research that shows the importance of primary care services for surpassing current health challenges. We look forward to submissions that include theory-based investigations in the form of experimental studies, observational designs with follow-up measurements, or systematic reviews. This Special Issue plans to answer the following questions: How do patients access primary care services nowadays? Does digital technology promote health equality in primary care services? What are the new strategies for primary care services in adapting to current adversities? Are primary care teams resilient enough? Have the roles of the primary healthcare workers (doctors, nurses, community pharmacists, psychologists, dentists, and all others who work in teams providing primary care) changed? How can primary care teams increase patients' safety? Do we need to change the future training of primary healthcare workers and address how to face adversity?

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
