Health and Welfare, Jönköping
University, 551 11 Jönköping,
Sweden

Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editors

Participation, defined as involvement in life situations, is considered beneficial to children's development, health, and well-being. This Special Issue hopes to advance this current body of knowledge through high-quality multi-disciplinary research that enhances our understanding of: (1) The impact of participation on subjective well-being; (2) Effective interventions to improve children's participation and emotional well-being; (3) Knowledge translation (KT) strategies and implementation processes aimed at bringing changes in clinical practice towards a greater focus on participation for this population. We welcome research on participation in different settings that focuses on but is not limited to the following lines of inquiry: Well-designed intervention studies (pilot studies, impairment-based interventions, and exercise programs are not within the scope of this Special Issue); Studies examining the relationships between participation and well-being; KT initiatives facilitating the uptake of new evidence regarding participation and/or well-being in clinical day-to-day practice.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
