Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editors

For this Special Issue, we welcome original articles and reviews on epidemiological research and/or methods focusing on chronic diseases. Research articles based on primary or secondary data focusing on social determinants of health, access to care, interventions, longitudinal studies, and risk factors of chronic diseases are encouraged. This Special Issue will also consider articles on the impact of chronic health conditions on Covid-19 severity. Epidemiological methods based on spatiotemporal analyses, Bayesian methods, multilevel modeling, time series analysis, or causal inference using theoretical or empirical approaches are also of interest. Research-to-practice articles highlighting the successful implementation of evidence-based research will also be considered.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
