closed (17 July 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims at providing a versatile collection of studies using various constructs, data sources, and analytical approaches to broaden the current knowledge on theoretical (e.g., etiological models, predictive associations) and practical implications (e.g., treatment, prevention, and policy) in the context of psychosocial burden and criminal behaviors. This collection of studies may inspire research, treatment, and policy approaches that support individuals at risk of criminal behaviors to develop toward a healthy, non-delinquent future, and thus protect society from further crime.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
