### Message from the Guest Editors

Dear Colleagues,

Cyberbullying, or electronic aggression, via the internet, is a problem of the 21st century that has attracted growing concern and a great increase in research attention. This Special Issue in the International Journal of Environmental Research and Public Health (IJERPH) will focus on cyberbullying from a lifespan perspective. We welcome contributions on internet aggression generally – that is, we are not too concerned about distinctions between cyberbullying, cyber aggression, internet abuse, etc., although it is important that any empirical study make it very clear what exactly is being measured.

We are seeking to have a clear developmental perspective in this Special Issue. Contributions might be with populations outside of the school age range, for example, in colleges, workplaces, clubs, or other adult venues. Alternatively, they might be in school-aged populations, but only if developmental changes are a major part of the analysis and discussion. We will not be looking for articles on cyberbullying in school-aged children that do not have a strong developmental perspective.

Keywords:

cyberbullying; development; internet abuse; workplace

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
